

RAPID DEPLOYMENT CHANGEROOM PARTNERSHIP

CLIENT
AFL

LOCATION
Shepparton, VIC

NUMBER OF MODULES
5

TIMEFRAME
16 weeks

The Ausco Modular and AFL partnership has delivered temporary changeroom facilities to Shepparton Swans Football Netball Club following devastating floods in October 2022. The club's existing damaged clubhouse requires redevelopment so portable facilities were required to enable the approaching 2023 season.

Five building modules consisting of changerooms for players and umpires were manufactured at Ausco's Adelaide factory, transported to site and installed within just 16 weeks.

The AFL-owned modular facility has the capacity to be moved to different sites as needed to assist community football clubs following disasters.

The Rapid Deployment Changeroom Partnership between Ausco Modular and the AFL is a fantastic demonstration of the commitment by both organisations to improving outcomes for local communities and their participants in the time of a crisis.
