

Golden Grove Primary School's Modular Transformation

CLIENT
Golden Grove State School

LOCATION
Adelaide, SA

Golden Grove Primary School in collaboration with Brown Falconer Architects and Ausco as the builder, undertook a visionary project to redefine their learning spaces. The project aimed to introduce modern construction methods, resulting in the creation of innovative modular facilities. Brown Falconer architects envisioned a cutting-edge design, including a Resource Centre, offices, Special Learning Areas and breakout spaces. Ausco, utilising advanced modular construction, turned this vision into reality, ensuring quality control and swift off-site fabrication.

The collaborative efforts of Sensum as the managing contractor, Aurecon as the service consultant, and Ausco resulted in the successful realisation of state-of-the-art facilities. The completed project stands as a testament to the effectiveness of modern construction techniques, providing Golden Grove Primary school with inspiring and sustainable learning environments.

This case highlights the positive impact of innovation on education infrastructure, showcasing the potential of modular construction in shaping the future of learning spaces.
