

COOMERA ANGLICAN COLLEGE CHANGEROOM

CLIENT	COOMERA ANGLICAN COLLEGE
LOCATION	GOLD COAST, QLD
TIMEFRAME	12 WEEKS
COST	\$350,000

“The location that was thought to be unusable, allowed the college to provide changerooms facilities far closer than any other idea. This setup now allows the school to maintain facilities while their master plan is realised over the next 2 to 3 years’ worth of construction.” Said Ausco’s Mark Watkins.

“Ausco Modular is proud to be able to provide solutions to Schools that solve immediate problems.”

Ausco has one of Australia’s largest fleets of buildings suitable for just about any job site and are conveniently located right across Australia. Regardless of your needs or the site’s location, we’ll be able to help.

Faced with an immediate need for new toilet and changeroom facilities, Coomera Anglican College’s architect contacted Ausco to provide additional facilities to allow for refurbishment and extensions on existing buildings.

A key advantage of modular buildings is their ability to land on a difficult, sloping site. The challenging site required to Ausco to design ramp and stairs to let students access the building from two locations.

Works were completed on site without disruption to the school’s normal operations, including building approval and all service connections to several locations for electrical and hydraulic feeds. A full turnkey solution delivered on schedule, allowing Coomera’s students to carry-on with sporting functions without the inconvenience of seeking facilities further from the oval.

The building has been designed in such a way that it allows for safe and easy access, and meets disabled and ambulant requirements.
