Lalor North Primary School was in need of additional classroom space to accommodate the growing student numbers. Ausco Modular designed a high-quality learning space incorporating classrooms, student clusters and amenities.

The aim of the project was to create a collaborative learning environment for students that enabled functionality for the school community.

The entire project was completed within 24 weeks from the signing of the contract. This included designing and installing the modular building, as well as demolition works.

Ausco excelled in creating the schools concept, demonstrating the endless possibilities of modular design.
